The Water Treatment Company

Aquasafe VA25

Copper Corrosion Inhibitor

Product Benefits

- Helps control corrosion of copper and copper alloys.
- Helps maximize turbine condenser efficiency.
- Helps extend condenser tube life
- Can reduce maintenance costs.

Principal Uses

- **Aquasafe VA25** is an organic film-forming corrosion inhibitor formulated to protect copper and copper alloy metals in industrial cooling water systems.
- **Aquasafe VA25** may be used as a supplement to other corrosion control programs in open and closed recirculating cooling water systems.

General Description

- **Aquasafe VA25** is an organic liquid copper corrosion inhibitor. It is designed to supplement other chemical treatments used in utility and industrial cooling water systems that contain copper or copper alloys.

Feeding

- **Aquasafe VA25** should be fed directly from the drum or bulk storage tank to a location in the system where it will be uniformly mixed and thoroughly distributed. It should be fed continuously to maintain optimum product activity.

- The specific dosage of **Aquasafe VA25** will vary depending upon the operating characteristics of your system, the water chemistry, and the severity of problems encountered.

Safety & Handling

Do not take internally. Do not get in eyes, on skin, or on clothing. Wear rubber gloves and eye goggles when handling. In case of contact, wash skin with soap and water; for eyes, immediately flush with large amounts of water for 15 minutes and get medical attention.

Shipping

Aquasafe VA25 is shipped from manufacturing locations and regional distribution centres in 30/200 Kg non-returnable drums.
