Multicare B-812

Multi Functional Boiler Water Treatment

Product Benefits

- Helps inhibit scale formation and resultant tube failures
- No mixing required, requires only one dosing pump.
- Proven and effective treatment against corrosion and oxygen attack. Heat transfer surfaces are kept cleaner for best energy efficiency.
- Can reduce deposits, resulting in more efficient heat transfer, energy savings and fewer acid cleaning
- Easy application; active at low dosages.

Principal Uses

Multicare B-812 is a specially formulated blend of synthetic organic polymer, fast reacting phosphate, alkali, oxygen scavenger and antifoam that will provide a new standard of boiler cleanliness when used on medium to high hardness water.

Feeding

Multicare B-812 can feed as solution up to 5 to 10% and as such, should be fed into the feed water line via chemical dosing pump. Any interruptions in feed will result in scale or deposit formation in the boiler and possible tube failure.

Dosage

- **Multicare B-812** dosage will vary as a function of feedwater total hardness. Aqua Care representative will be pleased to recommend the proper dosages needed to help to ensure maximum program performance.

Handling & Storage

Multicare B-812 should be handled with caution. Do not get in eyes. Avoid contact with skin and clothing. In case of contact immediately flush with large amounts of water for at least 15 minutes; eyes, also get medical attention. Do not take internally. Keep out of reach of children. The recommended in-plant storage limit is one year.
